OUR HISTORY

F.lli Rivadossi Srl is a success story of almost sixty years, started in 1963 thanks to the intuition of its founder, Pierino Rivadossi, responding to the great demand of the Italian market of steel coffee pots, cups, saucers and cutlery.

The 80's were the years of the first major turning point in the company, with the development and creation of the article that will become the core business of the company, the "FOOD MILL" and the

opening to the markets of the Mediterranean area. The food mill was produced only in stainless steel, over the years it was also joined by the plastic model, thanks to the acquisition of new plastic injection molding machinery. An evolution that still today allows F.lli

Rivadossi Srl to produce plastic products in its own company, which are fundamental for its product range. This certifies to the continuous growth and evolution of our company.

Since the beginning of the 90's, F.lli Rivadossi Srl will become an important company in the household market thanks to the implementation of its production site, the acquisition of new machinery and the addition in the catalog of steel cookware and lids, produced in different sizes, thicknesses and shapes. In the following years new diameters, shapes and models will be introduced with the most varied functionalities to complete a range of products already assorted.

A new business expansion took place in the early 2000s with the production of new items such as dressing sets, professional steel kitchen utensils and nylon kitchen utensils that allow F.lli Rivadossi Srl to insert itself with some products also in the HoReCa market. In the following years the Italian sales network is implemented and new

customers are also acquired in Europe for the supply of items in both Private Label and Rivadossi brand.

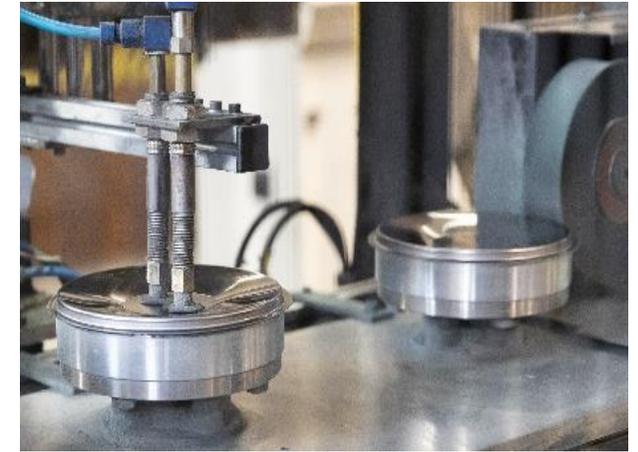

At the beginning of 2010, production and sales of items for special cooking began in order to meet the various requests received from customers of the wholesale/retail channel. At the same time, F.lli Rivadossi established itself in the domestic market, thanks to its flexibility and collaborative relationships with companies in the Far East, for the production of items no longer available in Italy, such as the glass lid.

The F.lli Rivadossi continues to internationalize its company by entering into trade agreements with companies in the Far East for the development of our brand in the local market. At the same time in Italy the period of renewal of the full product range begins with the inclusion of items with refined details, the study of new packaging suitable for an international market and the creation of a new brand, more fresh and modern, to be able to make facing the new requests of foreign markets.

The work setting strictly linked to the territory, the excellent quality standards, the innovative machinery, the continuous search for new materials and improvements to its products, the design and the internal creation of new products and molds, as well as availability and reliability of highly qualified personnel, have made F.lli Rivadossi Srl the right partner for the creation and production of ad-hoc or Private Label items.

Today, F.lli Rivadossi Srl is managed by the sons of Pierino Rivadossi, which Egidio is the natural successor. We are now close to the third generation, but the objective does not change: to create, produce and sell with passion our household items with "that extra touch" and with the right quality-price ratio.

and the story continues...

OUR COMPANY

The F.lli Rivadossi company is based in 65, L.Cadorna street, Quinzano d'Oglio 25027 (BS) Italy since 1963, the year of its foundation.
